

Reciprocating Compressor Fluid

Increased Equipment Reliability

Clean Valve operation – Eliminates Deposits

Use in Sumps and Lubricators

Maximum Bearing Protection

Compatible with other ester fluids

Environmentally Friendly – Biodegradable

Ultimate Performance AND Value

Diamond Blue™

Reciprocating Compressor Fluid is a blend of Diester and highly refined base fluids with an advanced additive package. It is designed to provide for clean valve operation, as well as protection from wear in single acting and double acting reciprocating compressors.

Diamond Blue reciprocating compressor fluid is designed to be a cost-effective drop in replacement for OEM fluids.

Specification	Diamond Blue Recip
Viscosity, cSt @ 40C	84
Viscosity, cSt @ 100C	9.5
Viscosity Index	86
Specific Gravity	0.92
Corrosion Protection ASTM-D665A	Pass
pH	7.0
Total Acid Number (TAN)	0.2
